BAC SOFT-IV

Powdered Fabric Softener/Sanitizer

EPA Reg. No. 1839-106-38398

EPA Est. No. 38398-NJ-01

DESCRIPTION

BAC SOFT-IV is a double action, powdered fabric softener and sanitizer and bacteriostat. Product is a concentrated formulation designed for use in institutional and commercial laundry applications. Product controls odor causing gram positive and gram negative organisms under conditions of high relative humidity or wet contamination.

PERFORMANCE

BAC SOFT-IV provides fabrics with a self-sanitizing shield and residual bacteriostatic activity. It also imparts luxurious softness and hand. Safe for all fabrics, including wools, silks, and synthetics, it revitalizes them and leaves a softness evident to both sight and touch.

ADVANTAGES

- Protects against bacteria-caused odors between washings.
- Eliminates static cling and minimizes lint.
- Reduces drying time.
- Provides easier shake-outs and pressing.
- Improves ironer efficiency.
- Eliminates scratchy collars, cuffs, and garment chafing.
- Shortens extracting time.
- Added dry to the washer.

DIRECTIONS

Add dry to the washer in the final operation. Allow 5 minutes for it to completely exhaust onto the fabric. Use 4 oz. per 100 lbs. of dry laundry.
