DE LIME

DESCRIPTION

DE LIME is an acid-type film and scale remover. It combines wetting and penetrating agents for safe and effective removal of lime film caused by hard water or baked-on food residues. It is effective on all types of metal surfaces as well as china, plastics, and glass. Caution, **DE LIME** may etch aluminum surfaces. **DE LIME** is recommended for use in restaurants, dairies, and other food processing plants.

DIRECTIONS

In restaurants, **DE LIME** is recommended for de-liming and de-scaling dishmachines, steam tables, coffee urns, cooking utensils, glassware and other surfaces subject to lime-filming. In dairies, **DE LIME** is recommended for removing milkstone from heaters, pasteurizers, hotwells, vacuum pans, and other hot milk equipment. It is also recommended for de-liming can washers and other washing equipment in all kinds of food processing plants.

For light film removal, as little as 1-2 ounces of **DE LIME** to 3 gallons of water is satisfactory. Heavier scales such as milkstone or beerstone require up to 1 or more ounces per gallon. For de-liming dishmachines, add 1 quart of **DE LIME** per 10 gallons of tank capacity. Soak or circulate hot solution until scale is completely dissolved. Heavily scaled equipment may require repeated treatment for complete de-liming. Drain and rinse equipment thoroughly before reuse. For especially heavy scale deposits, apply full strength either by brushing or pouring directly on the surface to be cleaned.

HANDLING

DANGER: CONTAINS PHOSPHORIC ACID. ACIDIC SOLUTION. CAUSES BURNS. Do not get in eyes, on skin, or on clothing. Keep container closed. Wear goggles or face shield, rubber gloves, and protective clothing when handling. Wash thoroughly after handling.

TECHNICAL PRODUCT BULLETIN

(over)

FIRST AID:

- EYES - In case of contact, flush with plenty of water for at least 15 minutes. Call a physician.
- SKIN - In case of contact, flush with plenty of water for at least 15 minutes. If irritation develops, call a physician.
- INTERNAL - If swallowed, DO NOT induce vomiting. Give large quantities of water. Give at least one ounce of milk of magnesia or aluminum hydroxide gel in an equal amount of water. If these are not available, the whites of two or three eggs may be used. Never give anything by mouth to an unconscious person. Call a physician.

PACKAGING

DE LIME is packaged in 4x1 gallon cases.
