ECCO RINSE-LT

DESCRIPTION

ECCO RINSE-LT is an effective, economical drying and rinse agent for use in low temperature dishmachine applications. It is best used when automatically dispensed via injector to the final rinse line. Product reduces rinse water surface tension allowing for superior spot-free drying. Product is effective on silver, flatware, china, glassware, and plastic.

DIRECTIONS

ECCO RINSE-LT is most effective when used in rinse water at 140°F. Lower temperatures will inhibit activation of the drying agent. Rinse aid injector is set depending on conditions and desired results; however, 1 - 2 ounces of **ECCO RINSE-LT** is generally effective for 100 gallons of rinse water. Consult your local Pariser representative for specific use procedures.

HANDLING

ECCO RINSE-LT is slightly acidic and may be mildly irritating. In case of contact with skin, rinse liberally with water. For eyes, continue flushing and if irritation persists, get medical attention.

ECCO RINSE-LT should be stored at room temperature. Avoid freezing.

PACKAGING

ECCO RINSE-LT is provided in handy 1 gallon (4x1 gallon case), and 5 gallon containers.
