FLOOR FINISH 25

PRODUCT DESCRIPTION

FLOOR FINISH 25 has been developed by the Technical Service Laboratories of Pariser Industries, Inc. Through the use of a unique additive, exceptional performance properties will allow end users to experience a major reduction in labor costs due to the high finish durability and resistance to scuffing and black heel marks.

TYPICAL PROPERTIES

Appearance	Milky White Emulsion
Solids Content, %	25
Particle Charge	Anionic
pH @ 25°C (77°F)	8.5 - 9.0
Pounds/Gallons @ 25°C (77°F)	8.79
Freeze/Thaw Stability	Excellent
Oven Stability @ 52°C (125°F)	Excellent

CLEANUP OF SPILLS OR LEAKAGE

In case of spills or leakage, absorb with an inert material such as sand, earth or vermiculite. Dispose of material in compliance with federal, state and local regulations.

SAFETY

During the handling of this product wear rubber gloves and splash goggles. In case of skin contact, rinse with large amounts of water for at least fifteen minutes. In case of eye contact, flush with large amounts of water for at least fifteen minutes and see a physician. If swallowed, see a physician.

PACKAGING

FLOOR FINISH 25 is packaged in 6 gallon plastic pails and 4x1 gallon cases.
