HYDROCON

DESCRIPTION

HYDROCON is a finishing agent for laundry and wet-cleaning applications where fabrics require a more relaxed and softer hand. **HYDROCON** also improves stain resistance, and reduces static and pressing time.

APPLICATIONS

HYDROCON is used in laundry applications in the final rinse operation of the formula, and in wet cleaning applications in the break and/or the final rinse operation.

DIRECTIONS

1. For wet-cleaning applications, use at a rate of .25 - .30 oz. per 10 gallons of water.
2. For laundry applications (commercial machines), add 3 - 4 oz. per hundred weight (CWT).
3. For top loaders, ½ oz. to the final rinse compartment/operation.

PACKAGING

HYDROCON is packaged in 4 x 1 gallon cases and 5, 15, and 55 gallon pails.
