KEX-LT

DESCRIPTION

KEX-LT is a highly effective alkaline liquid automatic dish machine product for hard water applications. This modern formula offers controlled foaming characteristics and is recommended for low temperature dish machines. Product is instantly soluble and delivers excellent hardness sequestration economically. Surfactants provide effective one-step cleaning.

DIRECTIONS

General soil can be removed with the dosage of 1/4 to 1/2 ounce of **KEX-LT** per gallon of wash tank water capacity. Product is effective when used at wash tank temperatures of 140-150° F. Lower temperatures will increase product usage. Consult your Pariser representative for specific use directions as dosages will vary based upon local water conditions.

KEX-LT can also be used in glass washing machines. General usage is controlled by conductivity probe installed in the wash tank. Do not use on aluminum or soft metals.

HANDLING

KEX-LT is alkaline. Care should be taken not to wash aluminum products in machines using this product. Avoid contact with skin, eyes or clothing. Avoid breathing concentrated fumes. In case of contact with skin or eyes, flush with excessive amounts of water. For eyes, continue flushing with water for at least 15 minutes and get medical attention.

PACKAGING

KEX-LT is packaged in 5 gallon pails and 4 x 1 gallon cases.
