LLS™ LIQUID LAUNDRY SYSTEMS

P-3000

DESCRIPTION

P-3000 is a highly alkaline liquid built detergent. The product is a combination type containing biodegradable synthetic detergents, water conditioners and alkalinity for a wide range of soil found in hotel/motel and healthcare institutional facilities. Product is phosphate free, and alkalinity levels are higher in contrast than most built detergents on the market today.

PERFORMANCE

P-3000 is extremely soluble, and quick rinsing. **P-3000** quickly penetrates fabrics to loosen, emulsify and suspend soil preventing greying due to re-deposition.

P-3000 is safe on all fabrics although a Pariser representative should be consulted for proper usage rates.

ADVANTAGES

- Concentrated one shot product.
- Used as received.
- Requires less rinsing than conventional built detergents.
- Combines water conditioner, alkali, and surfactant requirements.
- Effective across a broad range of water hardness conditions.

DIRECTIONS

Light Soil 1 - 4 oz. per 50 lbs. of wash in the break operation at 150° -160° F.

Medium Soil 4 - 6 oz. per 50 lbs. of wash in the break operation at 150° -160° F.

Heavy Soil 6 – 10 oz. per 50 lbs. of wash in the break Operation at 150° -160° F.

HANDLING

P-3000 contains alkaline ingredients. Caution should be taken in handling. Do not take internally. If liquid gets on hands or in eyes, flush with plenty of water for 15 - 20 minutes. If irritation persists, get medical attention.
