PARA-TEIN

DESCRIPTION

PARA-TEIN is a product used in the removal of blood urine, milk, perspiration and other protein type stains. It shows great application on the spotting board of professional dry cleaners, and in most institutional laundries.

APPLICATION

1. Before spotting unfamiliar material or garments, always test on inside seam for colorfastness of dye.
2. Apply **PARA-TEIN** directly to the stained area of the linen.
3. If necessary, work the area gently with brush or spotting bone.
4. Level or rinse with steam gun or water, or put into normal wash process.

PACKAGING

PARA-TEIN is packaged in one gallon plastic containers, six to a case.
