SB-6

DESCRIPTION

SB-6 is a complete, all purpose, built synthetic detergent compound containing a very high quantity of biodegradable, non-ionic surfactant and ranges in washing strength between anhydrous metasilicate and orthosilicate as it relates to its built strength.

PERFORMANCE

It is truly the all purpose product for linen and industrial uniform washing. Because of its high surfactant content, it does not require additional solvents or surfactants to wash all classifications from light to extra heavy soil.

ADVANTAGES

- Completely biodegradable
- Works effectively in hot or cold water
- Penetrates, emulsifies and rinses freely without soil redeposition or fabric damage
- Controlled suds

DIRECTIONS

Light Soil ½ to 1 lb. per 100 lbs.

Medium Soil 1 to 1 ½ lbs. per 100 lbs.

Heavy Soil 2 to 3 lbs. per 100 lbs.
