SMART WASH

DESCRIPTION

SMART WASH is a highly effective 100% biodegradable, alkaline liquid automatic dish machine product for heavy soil applications. This modern formula offers controlled foaming characteristics and is recommended for all types of dish machines. Product is instantly soluble, delivering excellent activity with economical results. High quality surfactants provide effective one-step cleaning.

DIRECTIONS

General soil can be removed with the dosage of 1/4 to 1/2 ounce of **SMART WASH** per gallon of wash tank water capacity. Product is effective when used at wash tank temperatures of 150-160° F. Lower temperatures will increase product usage. Higher temperatures will cause product to cloud. Consult your Pariser representative for specific use directions as dosages will vary based upon local water conditions.

SMART WASH is also recommended for use in glass washing machines. General usage is controlled by conductivity probe installed in the wash tank. Do not use on aluminum or soft metals.

HANDLING

SMART WASH is alkaline. Care should be taken not to wash aluminum products in machines using this product. Avoid contact with skin, eyes or clothing. Avoid breathing concentrated fumes. In case of contact with skin or eyes, flush with excessive amounts of water. For eyes, continue flushing with water for at least 15 minutes and get medical attention.

PACKAGING

SMART WASH is packaged in 4x1 gallon cases and 5 gallon pails.
