TUB SCRUB™

(Liquid Cleanser for Porcelain,
Marble, Enamel and Various Metals)

EPA Reg. No. 39272-4-38398

DESCRIPTION

TUB SCRUB™ is an EPA registered liquid cleanser/disinfectant especially designed as a scouring agent for porcelain, tile, enamel, and various metal finishes. The product cleans, polishes and scours without strenuous effort, and provides disinfection capability.

TUB SCRUB™ can be used on ceramic tile, marble, chrome, stainless steel and brass, pots and pans, washing machines, and white-wall tires. The product is a green, viscous, mint scented liquid.

APPLICATION

TUB SCRUB™ is the product of choice where deep cleansing action is desirable. While the product contains no harsh abrasive, certain cleansers are not ideally suitable to glazed surfaces, and care should be exercised in not scoring or otherwise damaging such protective coatings.

DIRECTIONS

TUB SCRUB™ is applied to the surface to be cleaned on a damp cloth or sponge. The surface is wiped and freely rinsed.

HANDLING AND CAUTION

Keep out of reach of children. If contact with eyes, flush with plenty of water for 15 minutes and get medical attention.

PACKAGING

TUB SCRUB™ is packaged in quart bottles 12 to a case.
