LLS™ Liquid Laundry Systems

ECO-SOUR

DESCRIPTION

ECO-SOUR is a non-toxic, rapidly biodegradable citrus-based liquid laundry sour that is an effective agent for neutralizing bicarbonate alkalinity residuals in textiles.

Product has direct application where final pH of linen is required below the range found in the raw water used for rinsing.

APPLICATION

ECO-SOUR is used in the range of 1-2 ounces per 50 pounds of linen, depending on the pH range and iron concentrations existent.

Care should be used so as to maintain a pH of the linen between 5.5 to 6.5 depending on the classification and finishing procedures.

Gross overfeeding of product is not recommended due to its acid nature and the potential damage to fiber that could occur in this manner.

Product meets the EPA criterion 3.4.3 for cleaners in the Green Seal Environmental Standard for Lodging Properties (GS-33).

HANDLING

ECO-SOUR is an acid that can safely be used for souring and rust removing applications.

Extreme care should be used in its handling. Product can cause skin and eye irritation upon contact, and if this occurs, area should be rinsed for 15 minutes with water or a solution of bicarbonate of soda.

PACKAGING

ECO-SOUR is packaged in 5, and 15 gallon plastic pails.
