

**PARISER INDUSTRIES, INC.**  
91 MICHIGAN AVENUE, PATERSON, NJ 07503  
(973) 569-9099 **SILCON** FACSIMILE (973) 569-9101  
**(Low Temperature/Non-Caustic Laundry Builder)**

## DESCRIPTION

**SILCON** is a concentrated liquid builder for use in automated feed, liquid laundry applications.

The Product is designed for use in heavy soil applications where a Non-Caustic silicate alkaline additive is desired for purposes of removal of oily based soil in Polyester, and Poly/Cotton blends.

## APPLICATION

**SILCON** is a product of choice typically where a non-caustic, alkaline builder is required for use on Table Linen and Food Service garments are processed. Its lower alkalinity/pH is an important feature where waste-water regulations limit causticity in laundry effluent, and its nature permits use in lower hot water temperatures that customary for caustic based alkalis.

Additional use is found on oil field and mechanic's garments, and/or anywhere that textiles are heavily impregnated with carbon/oily based soils.

## USAGE

Actual dosages are best recommended by your Pariser field-service technician, and will be based upon soil classifications and degree of contamination, along with other variables such as water hardness, temperature, and wash formula time constraints.

Wash-Cycle Titrations are recommended for quantification of alkalinity levels in the break operations accordingly.

## PACKAGING

**SILCON** is packaged in 5, 15, and 55 gallon Plastic Drums.

## CAUTION

**SILCON** is highly alkaline and can cause eye and skin irritation. In case of contact, remove wet garments immediately, and flush eyes and/or skin with large amounts of water for 15 minutes. See the First Aid procedures on the product label and Safety Data Sheets.
