
TECHNICAL PRODUCT BULLETIN

A red rectangular box with the text 'KEX PLUS' in white, bold, sans-serif capital letters centered inside.

Description

KEX PLUS is an alkaline liquid automatic dish machine product for heavy soil applications. This formula features controlled foaming characteristics and is recommended for all types of dish machines. This product is instantly soluble, delivers excellent activity at economical costs, and provides effective one-step cleaning and de-staining.

Directions

General soil can be removed with the dosage of 1/4–1/2 ounce of KEX PLUS per gallon of wash tank water capacity. This product is effective when used at wash tank temperatures ranging between 150–160°F. Lower temperatures will increase product usage. Higher temperatures will cause the product to cloud up. Consult your Pariser representative for specific usage directions as dosages will vary based on local water conditions.

KEX PLUS is also recommended for use in glass-washing machines. General usage is controlled by a conductivity probe installed in the wash tank. Do not use on aluminum or soft metals.

Handling

KEX PLUS is alkaline. Care should be taken not to wash aluminum products in machines using this product. Avoid contact with skin, eyes, or clothing. Avoid breathing concentrated fumes. In case of contact with skin or eyes, flush with excessive amounts of water. For eyes, continue flushing with water for at least 15 minutes and get medical attention.

Packaging

KEX PLUS is available in 4x1-gallon cases, 2.5-gallon and 5-gallon containers.
