WCS™ Wet-Cleaning Systems

AQUA VELVET**Description**

AQUA VELVET represents a breakthrough in wet-cleaning innovation chemistry. It is an all-in-one (one-shot) wet-cleaning product which combines an acid-based detergent (to inhibit dye loss on dry-clean-only fabrics), stain removers, and fabric conditioners. This formula was meticulously blended to allow for genuine wet-cleaning even in regular top-loading machines. It leaves articles with a fresh, clean-smelling fragrance. AQUA VELVET has been certified by the EPA's Safer Choice program as an environmentally-preferred wet-cleaning product.

**Applications**

AQUA VELVET has general uses in wet cleaning and laundry detergent applications. This product can be used on a broad range of fabrics, including suede. It can also process dark-colored dress shirts.

Directions

- **Top-loading machines:** Use 4 ounces per load.
- **Commercial 50-pound washers:** Use 8 ounces per load.

Clean on gentle cycle for 7 minutes, one rinse, and a short extract. Dry garments to 15% moisture retention for maximum softness.

Packaging

AQUA VELVET is available in 4x1-gallon cases, and 5-, 15-, and 55-gallon containers.
