

## Technical Product Bulletin

### OXI-LYTE

OXI-LYTE is a concentrated, hydrogen peroxide-based laundry bleach, safe on most fabric types and colors. (Note: Product should not be used on wools or silks without pre-discussion with your Pariser representative).

#### Performance

OXI-LYTE affects stain removal of oxidizable/bleachable stains; the product provides concentrated sanitizing, brightening of colored and white garments, and significant destaining power when used as directed.

#### Advantages

- Available in multiple sizes (the 2.5-gallon container is the easiest to store and discard)
- Product breaks down into harmless components, unlike chlorine bleach alternatives
- Infinitely soluble
- Safe on colors; leaves no harmful residuals in the processed textiles

#### Directions

Your Pariser representative will recommend the appropriate dosage. Typically, a 6–8 ounces per hundredweight (cwt) dosage will provide desired results.

#### Handling

Use extreme care in handling OXI-LYTE. Keep away from skin and eyes. If in contact, flush with plenty of water for 15 minutes and call a physician.

#### Packaging

OXI-LYTE is available in 2.5-gallon totes and 5-, 15-, and 55-gallon containers. Best if used within nine months of packaging date.
