

## Technical Product Bulletin

### P-3000

P-3000 is a highly alkaline liquid-built detergent. The product combines high alkaline compatible synthetic detergents, water conditioners, and builder for a wide range of soil in hotels/motels and healthcare institutional facilities. The high alkalinity level is comparable to or better than most builder-only additives today.

#### Performance

P-3000 is a highly soluble and quick rinsing product that quickly penetrates fabrics to loosen, emulsify, and suspend soil to prevent greying due to redeposition. P-3000 is safe on all fabrics; consult a Pariser representative for proper and safe usage parameters.

#### Advantages

- Concentrated one-shot product (combines the functions of a separate alkaline builder and surfactant).
- Used as received.
- Requires less rinsing than conventionally built detergents.
- Combines water conditioner, alkali, and surfactant requirements.
- Effective across a broad range of water hardness conditions.

#### Directions

Light soil: 2–3 ounces per 50 pounds of wash in the break operation at 150–160° F.

Medium soil: 4–6 ounces per 50 pounds of wash in the break operation at 150–160° F.

Heavy soil: 6–10 ounces per 50 pounds of wash in the break operation at 150–160° F.

#### Handling

P-3000 contains alkaline ingredients. Use caution when handling. Do not take it internally. If liquid gets on hands or in eyes, flush with plenty of water for 15–20 minutes. If irritation persists, get medical attention.

#### Packaging

P-3000 is available in 2.5-, 5-, 15-, and 55-gallon containers.
